DETAILED ACTION

1. This is in reply to amendment filed on January 26, 2006. **Claims 2-4 and 16-20 have been canceled. Independent claims 1 and 15 and dependent claims 5, 7-8, 11, 21-22 and 27 have been amended. Claims 29-40 have been allowed on the previous office action. Claims 1-40 have been re-examined.**
2. **No new claim has been** added.

Allowable Subject Matter

3. **Claims 1, 5-15 and 21-40** are allowed.
4. The following is an examiner's statement of reasons for allowance:
5. **Claims 29-40 had been allowed previously**, since the subject matter recited in the **independent claims 29 and 35** is about a distinct and particular method of generating and installing a master key replacement key and a new master key post issuance without using a potentially compromised master key to access a PSD's security executive, having particular feature which is found to be novel. **Refereeing to the Independent claims 1 and 15**, the limitation recited in the respective claims were fully disclosed by the previous reference used namely Lee before the claims were amended. However applicant has amended these two independent claims. The subject matter of allowable claim 4 (previously objected) and all the intervening claims have been incorporated into independent claim 1. Similarly, the subject matter of allowable claim 20 (previously objected) and all intervening claims have been incorporated into base independent claim 15.

The subject matter now recited in these two independent claims is about a distinct and particular method of generating and installing a master key

replacement key and a new master key post master key post issuance without using a potentially compromised master key to access a PSD's security executive having particular features which are found to be novel.

None of the prior art of record taken singularly or in combination teaches or suggests a data processing system and method for replacing root cryptographic keys installed inside a personal security device without requiring the use of potentially compromised root keys as recited in the **respective independent claims.**

For this reason, all the independent claim are allowed.

6. The dependent claims which are dependent on the above independent **claims 1, 15, 29 and 35**, being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
